EDITING TOOLS – DEPENDENCY MANAGER

- Every page and file in the CMS gets a unique ID number
 - “Dependency Tag”
- When making links, the CMS uses the ID number, not a URL
- Links to files get automatically updated when they move or are renamed
- Broken links will only come from deleted files

REUSABLE CONTENT

Assets

- Provide a single source of content for use on multiple pages
- When you want to reuse content and structure/styling
- Not customizable on page
- Pages update automatically
- Five types:
 - Web Content
 - Plain Text
 - Source Code
 - Image Gallery
 - Forms

REUSABLE CONTENT

Snippets

- Insert predefined content into a page while editing and are often used for pieces of content with specific formatting
- When you want to reuse structure/styling, but keep content unique
- Customizable on page
- Changes to one page won't affect other pages
- Makes it easier to edit complex blocks of content in WYSIWYG

REUSABLE CONTENT

Components

- Gather information and adds it into complex design elements
- When you want to reuse structure/styling, but keep content unique
- Uses form fields to prompt for content
- Customize content on each page
- Changes to the Component's base code WILL be reflected across all pages with the Component

LET'S SEE IT!
