Accessibility Check in CMS

All CMS customers have the option of enabling an Accessibility Check that can be used in the Page Check tool on each page.

When this check is enabled, any user with access to a page can run the accessibility check from either the Final Check tab of the Publish Window or the Page Check tool from the More Actions button when the page is checked out to the user.

This check on its own can only check one page at a time.

Accessibility Settings

Administrators in the CMS enable the Accessibility Check and set the WCAG Guidelines that are used in the Account Settings found in the Setup Menu. It is here where the various impact levels of issues can be turned on or off in the check. Exceptions can be managed here as well.

In the Site Settings, Admins can force checks to be run automatically when the page check tool is open and even add conditional publishing parameters for non-admin users based on the results of the checks.

About Insights

Insights is a powerful reporting tool that can be purchased as an add-on to your Modern Campus CMS Account.

Insights scans the published pages on your site, you may also have it scan pages from other sites managed elsewhere, checking the page in four categories:

- SEO (Search Engine Optimization)
- **Accessibility**
- Links
- Spelling

Insights Configuration

Insights is configured in Site Settings found in the Setup Menu, which only a level 10 Admin can access. Here is where you can determine how often Insights runs, which users have access to the report, and directory index value(s) that apply to your production server.

The screenshot shows the Modern Campus CMS Setup menu. The left sidebar lists various settings categories under the heading 'GALLENA'. The 'Optional Features' category is highlighted with a red bar. A red arrow points from the 'Optional Features' category in the sidebar to the 'Optional Features' section in the main content area. Another red arrow points from the 'Insights' feature in the 'Optional Features' list to the 'Insights Configuration' section below.
